

REMARKS:

On September 15, 2005, a Notice of Drawing Inconsistency with Specification was issued. Specifically, the drawings of the present application include six figures, whereas the Brief Description of the Drawings only describes five figures. The proposed replacement section includes a description of the sixth, previously omitted description of Figure 6. Because this additional paragraph necessitated the renumbering of some of the remaining paragraphs, Applicant further proposes an amendment to the Detailed Description of Preferred Embodiments, including the renumbering of these paragraphs.

Applicant believes that all of the issues addressed in the Notice have been addressed and traversed. As Notice of Allowance and payment of issue fee have already occurred, the present application should now issue into a patent without further delay.

Respectfully submitted,

Dated: Sept. 26, 2005
